The W.I.S.H.

Ancient Jewish

Wisdom and Insights on Success and Happiness

Imagine if Anthony Roberts had studied your character, personality and achievements and then designed a motivational program for growth *just for you!* Judaism maintains that the Torah is G-d's handbook for humanity; the "owners manual" to the universe. If insights exist into the most important issues, one would assume they would be contained in the owner's manual written by the manufacturer. Well then, what could be more central to our life and times than the twin issues of success and happiness?

The WISH is presented as 34 hour seminar and workshop program in two sessions and features the Discovery Seminar's most experienced, exciting and sought after seminar leaders.

"My employees were astounded to learn that ancient techniques could help them become more productive and happier..."

"The WISH is everything I could have wished for...It was a fascinating and most entertaining experience."

"In the tradition of Discovery and WorldPerfect, you have another super "hit" on your hands..."
